

VISTA®
WINDOW FILM

PREMIUM ARCHITECTURAL WINDOW FILM

Most homeowners fail to realize...

Windows play a vital role in a home's energy efficiency allowing solar heat to enter in the summer months and home heat to escape in the cold months.

Windows typically account for 26% of the total heating load and account for 32% during the summertime cooling load.*

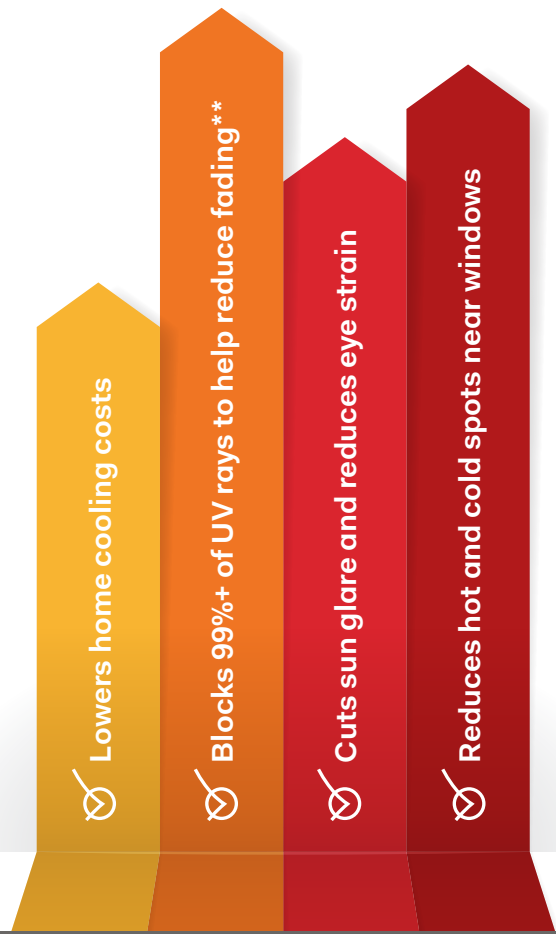

A cost-effective way to cut home energy loss is to upgrade existing windows with the installation of Vista™ Window Film by LLumar®.

The smart alternative to window replacement

While damaged or deteriorating windows simply have to be replaced, Vista™ Window Film by LLumar® provides an affordable alternative to replacement when your goal is to improve energy efficiency. In fact, the cost for quick, professional installation is a fraction of the cost of replacement windows. More importantly, Vista energy-saving film can also lower your home's cooling costs by reducing solar heat gain. For cooler climates, low-e window films can offer year-round energy savings.

Help the environment

The challenge of reducing energy consumption is on every home owner's mind as rising energy costs and power shortages frequently make the news. Reducing your home's energy consumption not only saves you money, it also helps the environment.

EnerLogic® low-e film

The EnerLogic Window Film series provides unparalleled glass-insulating capabilities and performance. EnerLogic's patented low-e film reduces solar heat from entering through windows while redirecting warm radiant heat back inside your home for energy and comfort savings in every season.

Preserve and protect

If you've remodeled, redecorated, or otherwise updated your home, you've taken great care in selecting the colors—but UV rays passing through windows can contribute to fading. Vista Window Film will help preserve the color brilliance of furnishings, fabrics, hardwood floors and carpets, and can even provide a measure of protection for fine woods, antiques and works of art.† It blocks 99%+ of ultraviolet rays**, helping protect against premature fading.

The UV blocking properties of Vista provide added ultraviolet protection for every member of the family. For that reason, Vista is recommended by The Skin Cancer Foundation.

† Films do not eliminate fading - they reduce it. UV rays and heat are contributing factors to fading, but other factors exist. For further information, see LLumar.com/download-library.

Enjoy the view

Dark, enclosed spaces have become a thing of the past thanks to Vista™ Window Film by LLumar®. Open the shades, blinds, or draperies and let the sun in. With Vista you can work at a computer, and watch television freely with up to 88% glare reduction, while controlling heat loss and/or gain.

Quick and easy installation

Our friendly experts provide free in-home estimates and consultations walking you through the process from selection to installation. Vista Window Film is professionally installed with no mess, no hassle – and minimal or no disruption to activities at your home or business. With Vista, you can be assured of a comfortable and beautiful environment in which to live or work.
